

# CP-16

CEILING STUD ADAPTER

# 150 lb WLL

CEILING ATTACHMENT

## STUD ADAPTER ON 16" CENTERS

This stud adapter plate is used to bridge two structural studs offering a secure surface mounting for Adaptive Technologies ceiling mount hole patterns as specified below. It bridges standard 16" wood and metal construction stud spacing.

This stud adapter plate is made from rugged alloy steel with two double horizontal flanges for added rigidity. The assembly is finished with a baked-on powder coat paint.

The CP-16 may be mounted over dry wall, plaster and other ceiling materials as long as it is firmly anchored into the structure. It can even be embedded inside the ceiling materials such as drywall for a clean flush appearance.

### STANDARD FEATURES

- ▶ Mounts on 16" stud centers
- ▶ Accommodates multiple Adaptive mounts
- ▶ Baked on powdered coat finish
- ▶ Low profile design

### OPTIONAL ACCESSORIES

- ▶ MP-500-115-CM for 1-1/2" Pipe
- ▶ MP-500-13-CM for 1/2-13 Threaded Rod
- ▶ MP-500NPT-GSA for 1/2" Gimbal Mount
- ▶ MP-1.5NPT-GSA for 1-1/2" Gimbal Mount
- ▶ MP-500NPT-CP for 1/2" Pipe
- ▶ MP-1.5NPS-CP for 1-1/2" Pipe

### SPECIFICATIONS:

**Materials:** Structural Steel Alloy  
**Finish:** Powder Coat  
**Color:** Black  
**Working Load:** 150 lbs / 68.2 Kg  
**Design Factor:** 5:1  
**Pack Count:** 1 unit / carton

### PACKAGE CONTENTS:

**1 pc** Ceiling Stud Adapter

Hardware for mounting to the ceiling structure is not included.

Rated for indoor use.
