COMMUNITY BASSHORN POLE MOUNT

PoleStar®

Adaptive's ultra-rugged 2-piece speaker mount is designed to secure and aim Community Pro's oversized R6 stadium horn outdoors from walls, roof tops and light poles.

Place this long throw, wind-rated stadium horn almost anywhere. The mount's outer cage secures to structural walls, light poles measuring 10" diameter or more and even bolted to roof tops.

This versatile super-strong mounting design is produced from structural alloy steel then treated with a long lasting outdoor rated galvanized finish. Its 2-piece construction makes for an easy assembly and its components install quickly and efficiently.

Note that the inner frame attaches directly to the speaker enclosure's front, back, top and bottom anchor points then rotates within the outer mounting cage frame from the speaker's center of gravity. This makes the down tilt adjustment of this 440 lb. speaker cabinet effortless. Contact customer service for more details.

STANDARD FEATURES:

- ▶ Designed exclusively for Community R6 Bass Horns
- ▶ 90° of effortless tilt adjustment
- ▶ Rated for outdoor use
- ▶ 2 piece simple assembly/installation
